James Heal ProView universal assessment viewer is designed and manufactured in the UK

The ProView library includes digital photographic images for a range of standards including ASTM D 3939 Mace Snagging, SnagPod, BS for Woven, Single jersey and double jersey, M&S Pilling and EMPA/

KEY BENEFITS

LIBRARY OF ASSESSMENT IMAGES

ProView contains a preloaded library of photographic images to grade a range of test methods including Martindale, Mace Snag Testing and SnagPod.

EASY TO NAVIGATE MENU

The preloaded library of standards are accessed via an easy to navigate menu which leads to an extensive range of photographic standards.

EMPA PILLING STANDARD PHOTOGRAPHS

In 2015 James Heal entered into an exclusive agreement with Swisstest Testmaterialien AG (formerly EMPA Testmaterialien AG) who own the so-called EMPA images.

Pilling Standard Photographs for EMPA Woven and Knitted standards are preloaded into the ProView to increase the range of images available.

EASY ACCESS VIA TOUCH SCREEN

Once the relevant standard has been selected the grading photographs are accessed via a 'swipe' of the integrated 7" touch screen. This makes the grading process is easy and efficient.

SAMPLE HOLDERS

A range of sample holders make the process of assessing and grading the samples very clear.

Dimensions (mm)	Weight (kg)
Height: 374	22.0
Width: 520	
Depth: 320	

COMPLETE SOLUTION

Everything you need for visual assessment is housed within this easy to use viewer.

STANDARDS FOR MACE SNAG TESTS

For mace snag testing to the ASTM and JIS standards an assessment cabinet is required to assess the level of snagging.

The ProView assessment cabinet is supplied for that purpose for markets which work to those standards.

RANGE OF STANDARDS

In addition to the EMPA Pilling Standards from Swisstest, grading photographs for other standard bodies and retailers are also preloaded.

BENEFITS OF PRELOADED IMAGES

Easy and simple to use, assessment is controlled with a swipe of a finger.

No risk of misplacing images. Eliminates time spent locating and setting-up physical photographs.

The preloaded photographs do not deteriorate or become dirty, removing the cost of purchasing replacement photographs.
